

James “Mannie” Hammond

B.S. Computer Science | Minor: Mathematics | Graduated May 2025 | Major/Minor GPA: 3.2
(580) 235-1937 • j.manniehammond@hotmail.com • Portfolio - [Mannie Hammond](#) | [Software Engineer](#)

Summary

Computer Science graduate with production experience building internal applications, automation tools, and SQL-driven software in enterprise environments. Backend-leaning developer with the strongest experience in Python, SQL, JavaScript, and application troubleshooting. Built software used by business, security, and operational teams during internship work at Chickasaw Nation.

Technical Skills

Languages: Java, JavaScript, Python, C, C++, C#, SQL, PowerShell, R

Web/Frameworks: HTML, CSS, React, Node.js, PySide6, Shiny

Databases/Cloud: SQLite, Azure SQL, IBM Db2

Tools: Git, GitHub, VS Code, Eclipse, RStudio, DBeaver

Experience

Software Engineering Intern | Chickasaw Nation | 06/2024 - 06/2026

- Built and supported internal software, automation tools, and SQL-driven applications used by multiple teams in live production environments.
- Developed solutions for business, security, and operational workflows in collaboration with Health IT, IT Security, Commerce, IT Service Desk, and management teams.
- Contributed to application development, data processing, troubleshooting, and internal tool delivery across multiple departments.

IT Service Specialist | OU IT – Norman, OK | 08/2023 - 05/2024

- Resolved 50+ technical support cases weekly across Windows, software, networking, user access, peripherals, and system issues.
 - Maintained clear documentation and adapted quickly to changing enterprise IT processes and support workflows.
-

Certifications

- GitHub Foundations — GitHub, 2026
-

Projects

Patron Monitor | Python, PySide6, IBM Db2, SQL/ODBC, pyodbc, R

- Built a production internal desktop analytics application for casino staff to monitor patron activity, inactivity trends, and retention behavior across properties.
- Developed a filterable dashboard for analysts, hosts, and player development teams with support for metrics such as Activity Level, Trip Habit, Host, Total Theo, Total Trips, ADT, and DSLT.
- Wrote custom SQL queries against IBM Db2 views to support table loading, filtering, pagination, sorting, dropdown values, row counts, and patron-specific trip history retrieval.
- Implemented patron-level drill-down workflows and R-generated visualizations comparing current Days Since Last Trip against historical trip-gap behavior to help identify abnormal inactivity and retention opportunities.
- Packaged the application as a Windows executable with bundled dependencies so non-technical internal staff could use the tool without a local development setup.

Project Tracker | R Shiny, DT, IBM Db2, ODBC, SQL, JavaScript

- Built a multi-user internal project tracking web application for an analytics/data science team to manage current projects, existing products, and completed work from one centralized system.
- Replaced spreadsheet-based tracking with a database-backed workflow that supports inline editing, dropdown workflows, date pickers, filters, row actions, audit logging, and Excel export.
- Integrated the application with IBM Db2 using custom read/write mappings, allowing the app to safely read from reporting views while writing updates to the base table.
- Implemented RowID-based selection and multi-user refresh handling to prevent incorrect updates during sorting, filtering, tab changes, and concurrent usage.
- Delivered the tool iteratively over several weeks, turning a basic tracker into a production-style internal system with persistence, auditability, and multi-user support.

CrewFlow Ops Website | HTML, CSS, JavaScript

- Built and deployed a live business website for CrewFlow Ops to present software, websites, and operations-focused services for local businesses.
- Designed and implemented responsive page layouts, navigation, calls to action, and service-focused content to create a polished user-facing web experience.
- Maintained the site as a public-facing project demonstrating front-end development, deployment, and iterative improvement outside of internal internship work.

Education

University of Oklahoma – Norman, Oklahoma

- B.S. Computer Science | Minor in Mathematics | Graduated May 2025

Oklahoma Baptist University – Shawnee, Oklahoma

- Studied Physics | Fall 2018 – Spring 2020

Accolades/Organizations

- Dean's Honor Roll: Fall 2021, Fall 2023, Spring–Fall 2024 (OU)
- Oklahoma Baptist University Varsity Football | University of Oklahoma eSports
